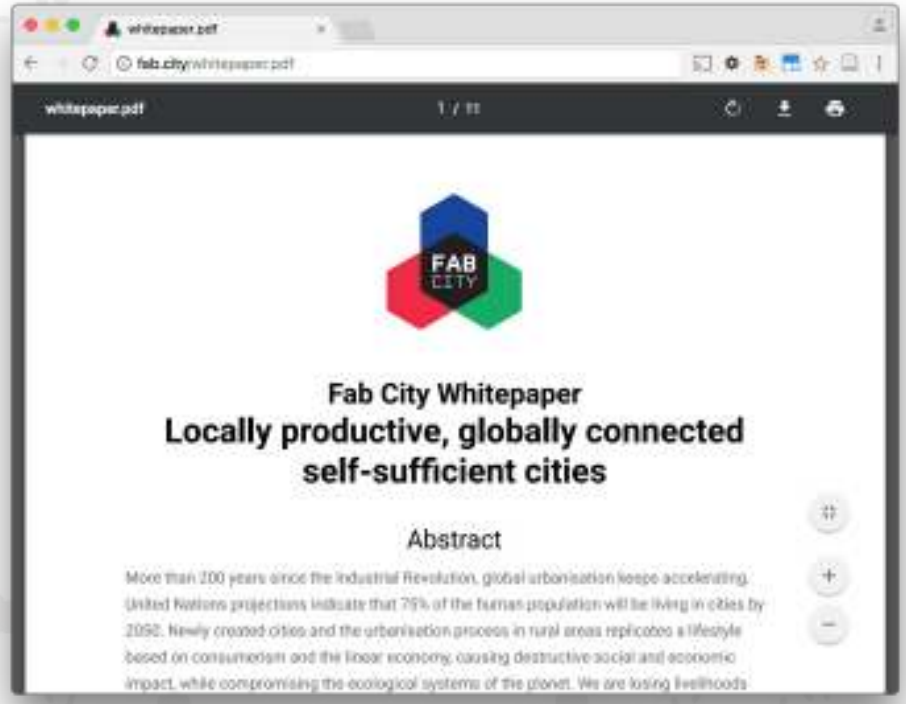
Iaac | FAB LAB BARCELONA

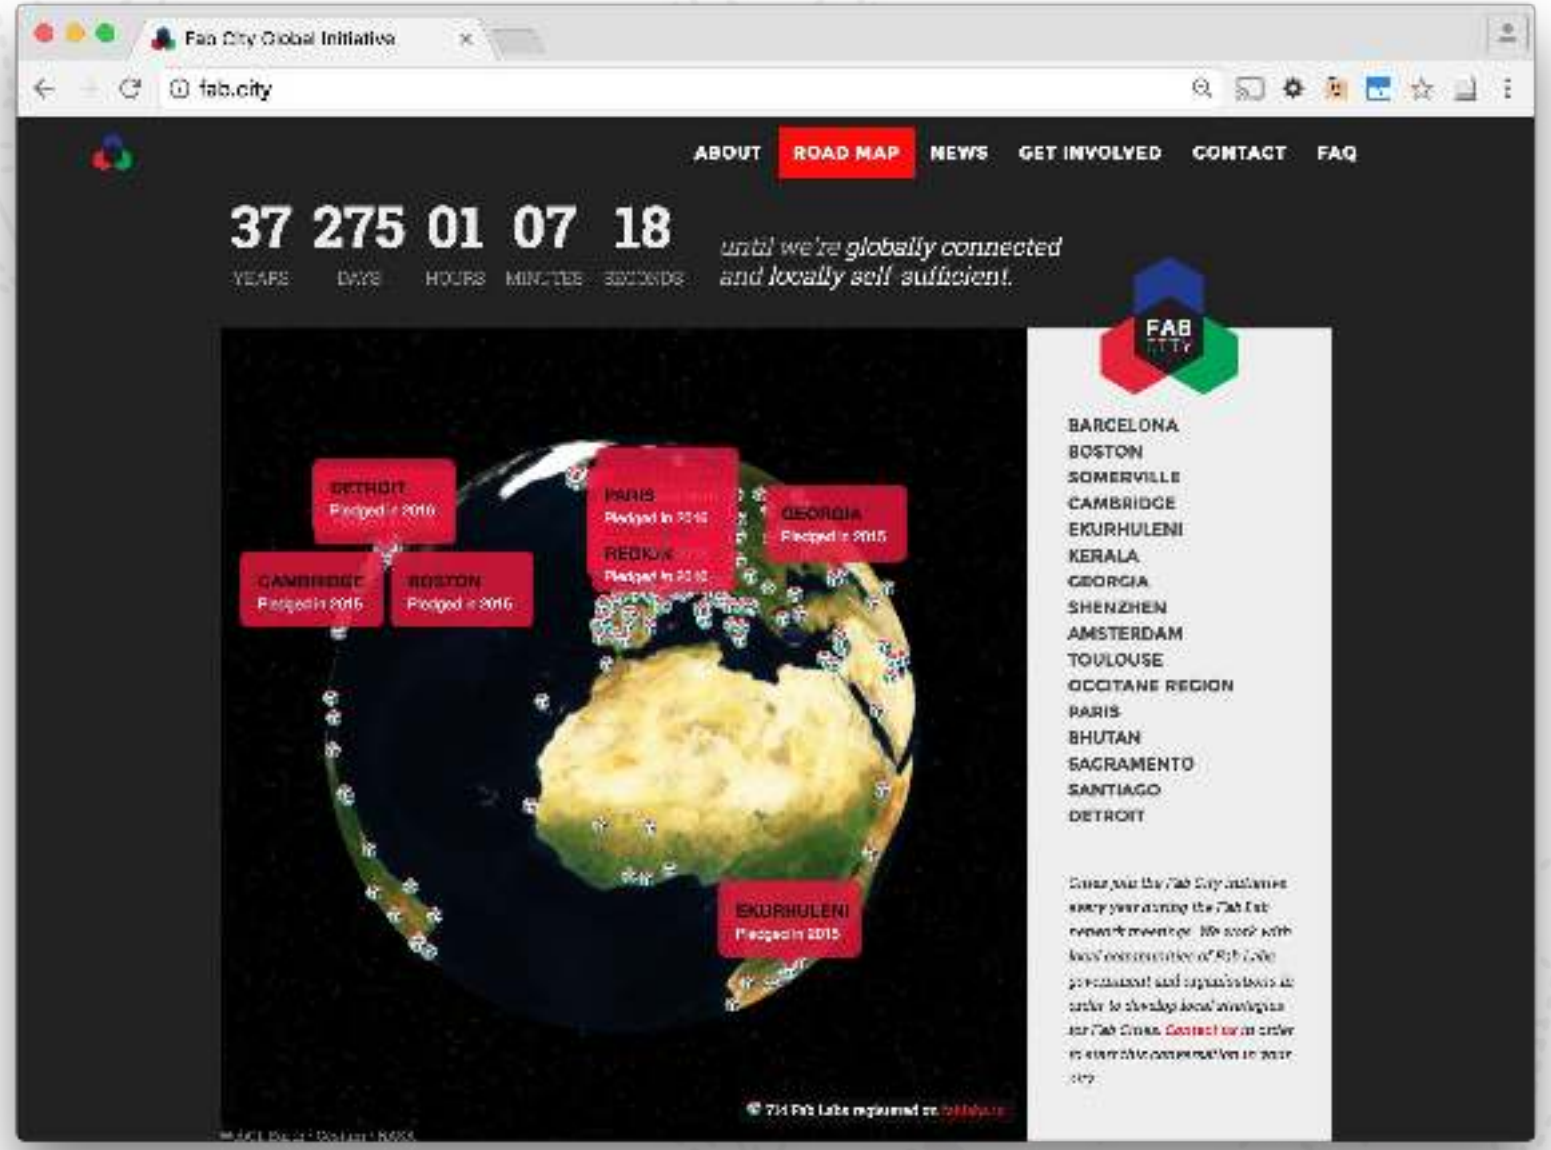
Makers: people, laboratories, technologies, …

(Source: https://www.flickr.com/photos/aaltofablab/9458872118/in/album-72157635386143531/)



A global project for the development of locally productive and globally connected self-sufficient cities.

http://fab.city/



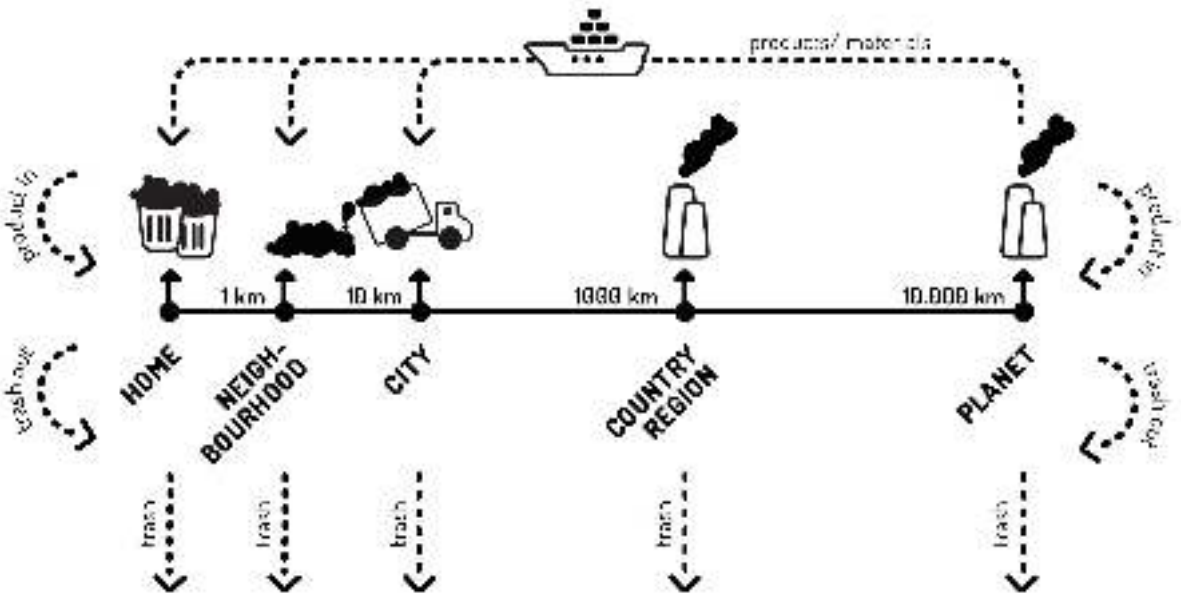
A global project for the development of locally productive and globally connected self-sufficient cities.

http://fab.city/

From PITO

[product in trash out]

The city as a linear trash machine.

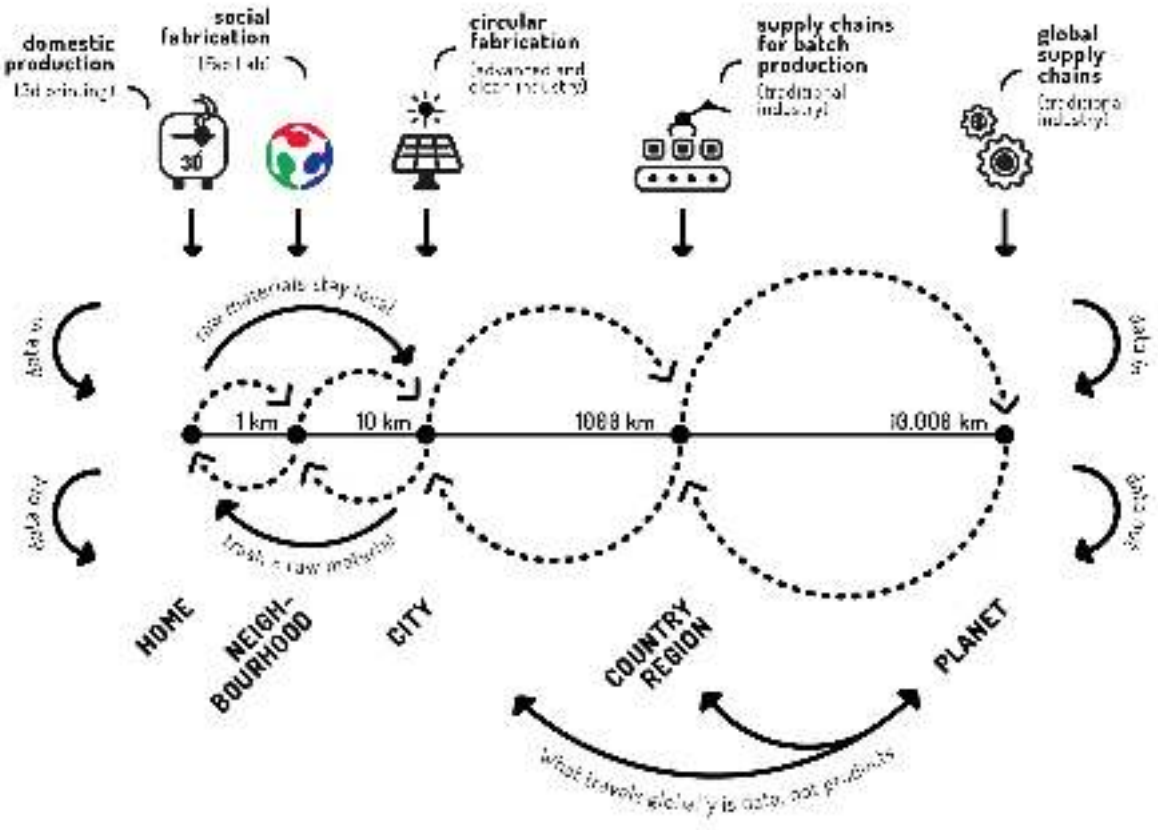


[products and materials travel thousands of miles to become waste, leaving massive ecological and social footprints behind]

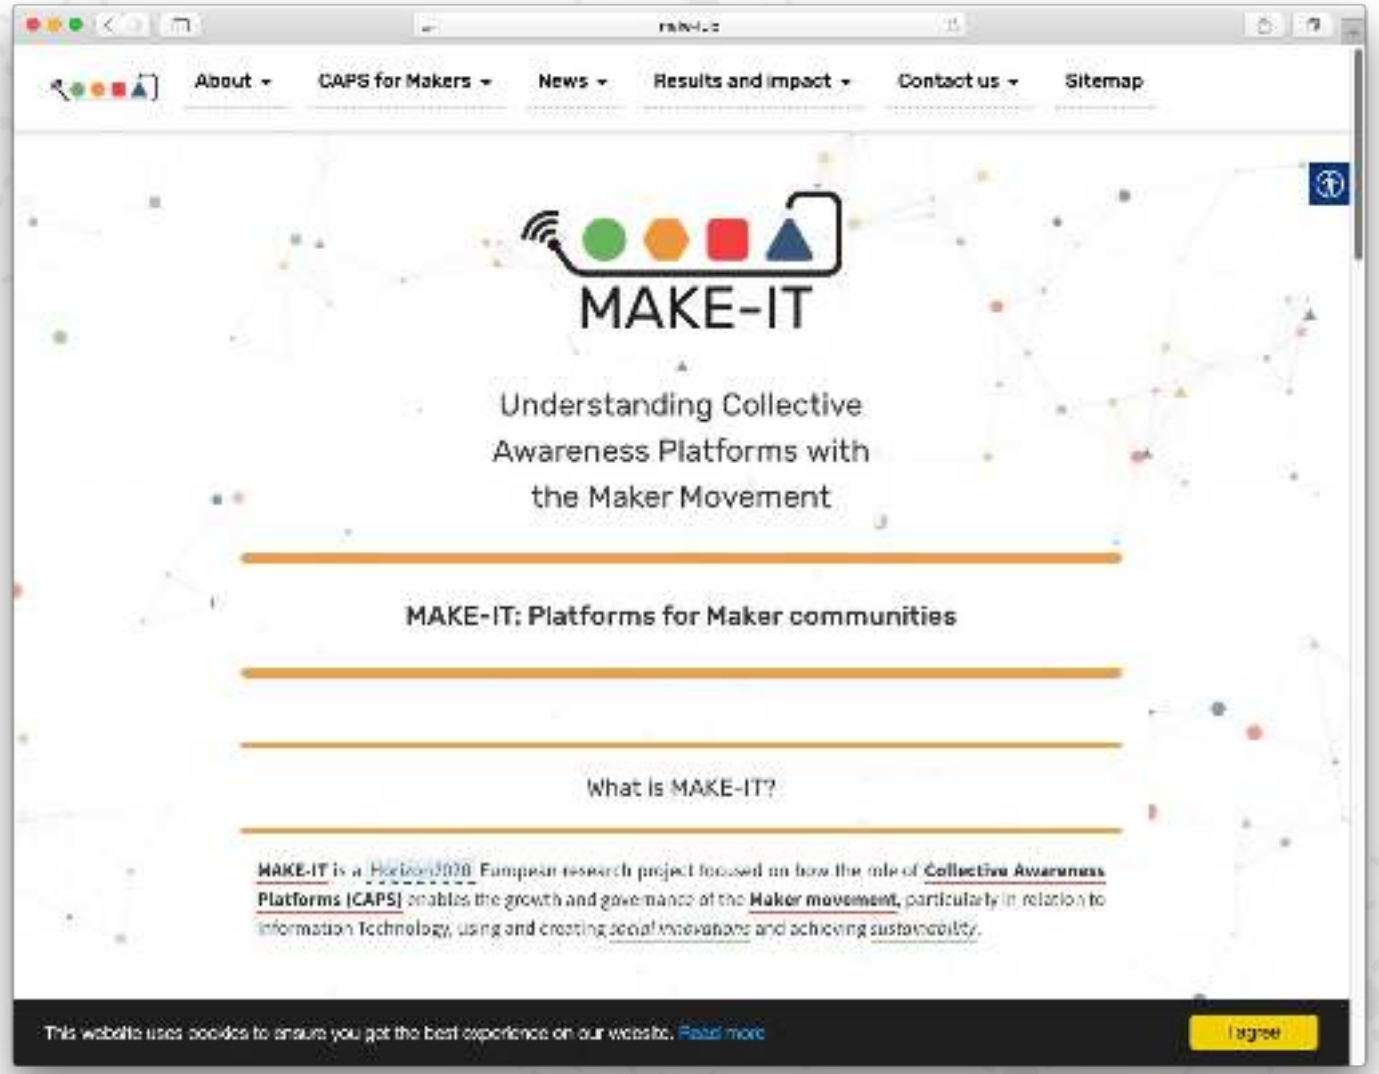
To DIDO

[data in data out]

City's imports and exports are data, not products or materials.



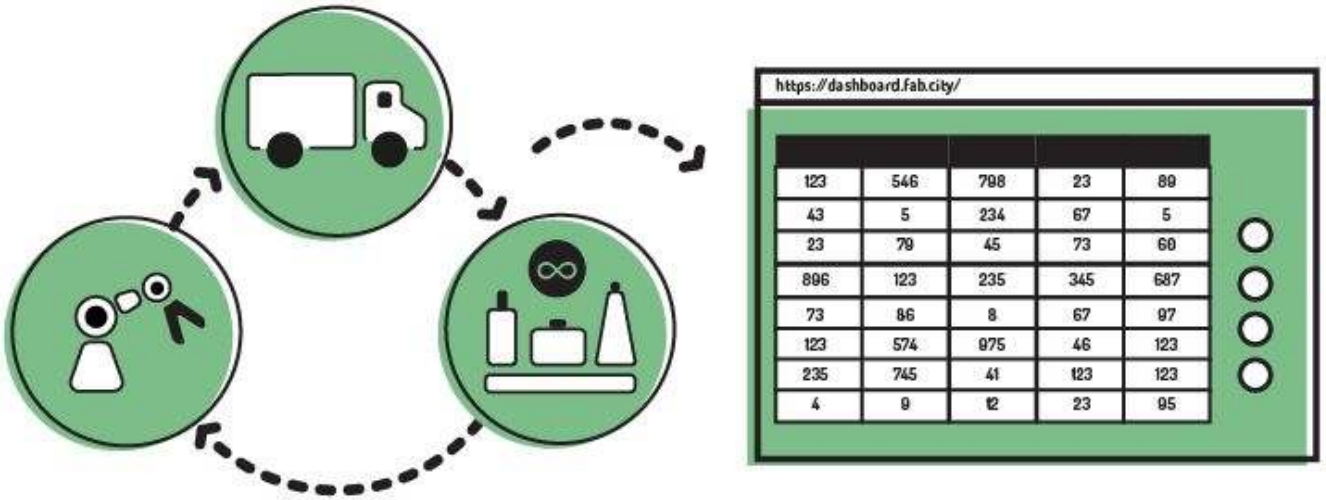
[resilience increases / energy consumption and carbon emissions are drastically reduced / raw materials and fabrication stay local]



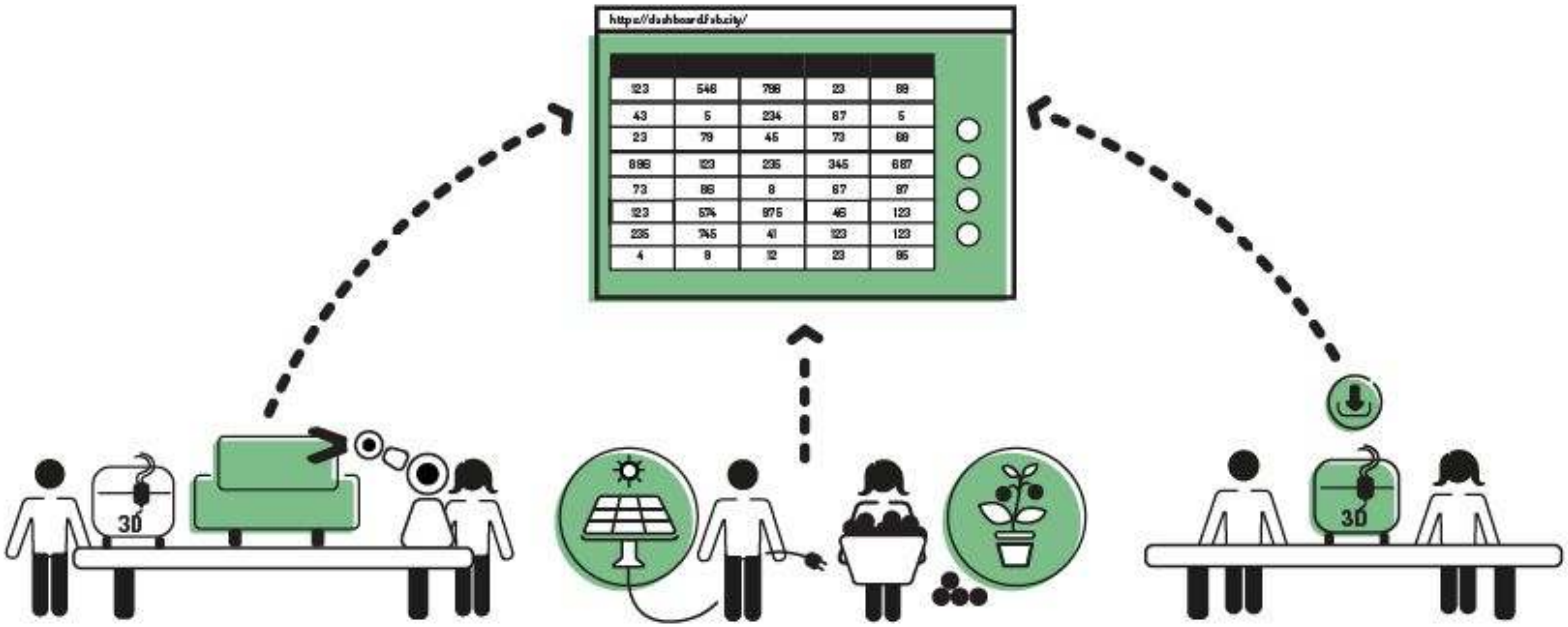
… and about participation and governance in Maker communities …

http://make-it.io/

Fab City Dashboard



What is the resilience of a city regarding its manufacturing, distribution and consumption of goods?
What is the role of citizens in shaping a Fab City with **open, distributed and collaborative projects** and making activities in the city?



A dashboard where citizens can understand **the existing resilience of cities** and how **the Maker movement** and its projects is having an impact on this.

ABOUT
City Resilience Index
¿How close is a city to being resilient, self-sufficient and guaranteeing opportunity and wellbeing to its citizens so that they can be the masters of their own destiny?
Based on the well-being indexes developed by OECD at country and regional level, data from the World Bank and fablabs.io, we developed a first prototype of the City Resilience Index that you can explore below.
learn more about the oecd better life index (at country level)
learn more about the oecd regional well-being index (at regional level)
or
proceed with the city resilience index below

INDEX CITIES PROJECTS ABOUT

BARCELONA

CATALONIA / SPAIN

The Barcelona metropolitan area comprises over 66% of the people in one of the richest regions in Europe – Catalonia, with a GDP per capita amounting to €28,400 (35% more than the EU average). Barcelona has a long-standing mercantile tradition. Less well known is that the region was one of the earliest to begin industrialization in continental Europe, beginning with textile-related works from the mid-1780s but really gathering momentum in the mid-19th century, when it became a major centre for the production of textiles and machinery. Since then, manufacturing has played a large role in its history. (Source: Wikipedia)
